

Lexus *Under the Hood Heroes* Video MPI Contest

BEST PRACTICES

Video Best Practices

The *Under the Hood Heroes* Video MPI Contest is your opportunity to highlight your expertise and represent the Lexus standard of care. Winning videos demonstrate clear communication, technical confidence, and guest trust.

It is what you deliver every day. Now it is your chance to put it on display.

Steps to Success

This Contest is designed to spotlight the video MPI you deliver every day.

Lexus Technicians are expected to create video MPIs as part of their day-to-day workflow. Judges are not looking for staged, rehearsed, or specially produced videos.

Choose and submit your strongest existing video MPI—one that best reflects your natural communication style, technical expertise, and how you normally serve Lexus guests.

Choose Your Submission with Purpose

Review the Program Rules and **select a video MPI** that best represents your complete MPI process.

Choose a video that reflects your everyday workflow, natural communication style, and guest-first mindset.

Your explanation should reflect the same confident, intentional communication you use when speaking with Lexus guests every day.

Review Your Selected Video

Watch your video MPI before submitting to ensure it clearly shows inspection results, aligns recommendations with visible evidence, and reflects Lexus professionalism.

Think Like a Lexus Guest

When selecting your video, evaluate it as the judges will, as though you are speaking directly to the guest who owns the vehicle. The camera represents their point of view.

- Use guest-friendly, professional language
- Speak clearly and at a steady pace
- Focus on helping the guest understand vehicle condition and next steps

When guests feel informed, they feel confident—and confidence builds trust.

Start Strong and Set the Tone

Look for an example that opens with a confident, guest-friendly introduction:

- Who you are
- What you are inspecting
- Why it matters to the guest

A strong opening establishes professionalism and immediately communicates value.

Show the Evidence

Top-performing videos do not just explain—they show.

- Use approved Lexus tools and procedures
- Hold the camera steady and avoid excessive movement or zooming
- Allow time for the guest to clearly see measurements, wear, or test results

Visual proof reinforces credibility and turns observations into facts guests can trust.

Explain What It Means

After showing the inspection results, explain what they mean in real-world terms:

- Increased Safety
- Improved Performance
- Enhanced Comfort
- Reliable long-term ownership

Avoid excessive technical jargon, and when technical terms are necessary, explain them simply and clearly.

Control the Flow

Winning videos are organized, focused, and well-paced.

- Follow a clear progression: introduction → inspection → findings → recommendation
- Stay focused on a clear, organized MPI flow as you present your findings
- Ensure that your presentation clearly relates to a complete MPI experience for your guest
- Manage your time—two minutes moves quickly

A controlled presentation reflects mastery and confidence.

Present Yourself the Lexus Way

Your presence reinforces the Lexus brand.

- Wear proper Lexus Technician attire
- Record in a clean, professional, well-lit dealership environment
- Minimize background noise and distractions

Speak naturally. Professional presentations strengthen credibility.

Technical Tips for a Strong Video

- Use a smartphone, tablet, or digital camera
- Shoot in landscape mode, not portrait
- Ensure good lighting—avoid shooting into bright lights or direct sunlight
- Test audio before recording
- If possible, have someone else record the video rather than filming yourself

Solid fundamentals help your message come through clearly.

Remember What Judges Are Looking For

Videos are evaluated from the perspective of a Lexus guest receiving an MPI update.

The best submissions feel real because they are real – captured during a regular service visit, created for an actual guest, and reflective of how Lexus Technicians deliver trust every day, with:

- Technical accuracy
- Clear, confident communication
- Professional presentation
- Logical organization and flow
- Recommendations supported by visible evidence

If your video helps a guest understand their vehicle—and trust your guidance, you are delivering the Lexus standard.

Your skills matter.

Your expertise matters.

**This is your opportunity to demonstrate what it means
to be a Lexus Technician.**
